

Official Statistics

GP Patient Survey 2026

The GP Patient Survey assesses patients' experiences of healthcare services provided by GP practices and experience of NHS pharmacy and dental services. The results are presented at GP practice, Integrated Care System (ICS), Primary Care Network (PCN), and national level.

Details

The survey assesses patients' experiences of healthcare services provided by GP practices, including experience of access to GP practices, contacting the practice, the quality of care received from healthcare professionals, experience

of services when their GP practice is closed and patients' experiences of NHS pharmacy and dental services. The survey also captures information about patient health, including patients with long term conditions, disabilities, or illnesses, and the support they receive to manage these.

Data is published at GP practice, Primary Care Network (PCN), Integrated Care System (ICS), and national level in variety of formats including a National Report, National Results and Trends, and organisation level reports. An interactive analysis tool is available to interrogate the data at different organisation levels, and this tool will also allow users to produce cross-tabulations and sub-group analysis.

Official statistics are produced impartially and free from any political influence.
