

# Appendix: burglary outcomes by force, London borough and city, with court outcomes

Compiled by nuze.com on 2 October 2026 from the Home Office "Crime outcomes in England and Wales" open data (year ending March 2026 release, 23 July 2026; outcomes as at extraction), the data.police.uk archive published for August 2026 (monthly street-level and outcome files, September 2023 to August 2026, with each crime's latest outcome as held at that release), the ONS lower-layer super output area to local authority lookup (2021 areas, 2024 authorities), the Ministry of Justice "Outcomes by offence" data (years ending March 2017 to 2026, and calendar 2010 to 2016 on the older processing basis), and the Crown Prosecution Service data summary for 2025/26. Percentages are of offences recorded in the period. Contains public sector information licensed under the Open Government Licence v3.0.

## 1. Residential burglary, England and Wales: outcomes by year the offence was recorded

2014/15 is incomplete in the open data (the Metropolitan Police for three quarters, Cumbria and Leicestershire for the year), so 2015/16 is the first clean year. From April 2017 "residential" includes sheds, garages and other buildings within a home's boundary, which lowers the rate. The latest year is immature: the 2024/25 charge rate was 4.7% when first published and is 5.8% a year later.

| Year    | Offences recorded | Charged or summonsed | Out-of-court disposal | Evidential difficulties, suspect identified (15, 16) | No suspect, victim does not support (14) | Investigation complete, no suspect identified (18) | Not yet assigned | Other |
|---------|-------------------|----------------------|-----------------------|------------------------------------------------------|------------------------------------------|----------------------------------------------------|------------------|-------|
| 2014/15 | 153,771           | 9.4%                 | 0.5%                  | 7.7%                                                 | 0.9%                                     | 78.0%                                              | 1.1%             | 2.4%  |
| 2015/16 | 194,702           | 7.3%                 | 0.4%                  | 7.8%                                                 | 1.5%                                     | 80.1%                                              | 1.6%             | 1.3%  |
| 2016/17 | 205,918           | 6.7%                 | 0.4%                  | 8.3%                                                 | 1.7%                                     | 80.3%                                              | 1.6%             | 1.1%  |

Flags: Greater Manchester could not supply data from July 2019 to March 2020; Devon and Cornwall is excluded by the Home Office from some year-on-year comparisons after a change of IT system; Humberside supplies no record-level data and has an unusually high share not yet assigned; the City of London records 25 to 34 residential burglaries a year.

### 3. London boroughs: all burglary (police.uk), April 2025 to March 2026, outcomes as at August 2026

police.uk does not split residential from non-residential burglary, and its categories are coarser than the Home Office's: "charged or at court" includes suspects charged, charged as part of another case, awaiting a court outcome, and court results. Boroughs are assigned from the anonymised location of each crime.

| Borough                | Burglaries | Charged or at court | No suspect identified | Unable to prosecute | Status update unavailable | Under investigation |
|------------------------|------------|---------------------|-----------------------|---------------------|---------------------------|---------------------|

### 4. Other large cities (local authority area), April 2025 to March 2026

Greater Manchester Police has supplied no data to police.uk for any month in the archive, so Manchester cannot be shown. Avon and Somerset supplied no outcome updates for much of 2023 to 2025 (Bristol's "status update unavailable" share); Northumbria never uses "unable to prosecute" on police.uk, so Newcastle's non-charge categories are not comparable.

| City                   | Burglaries | Charged or at court | No suspect identified | Unable to prosecute | Status update unavailable | Under investigation |
|------------------------|------------|---------------------|-----------------------|---------------------|---------------------------|---------------------|
| City of London (whole) | 533        | 24.2%               | 47.6%                 | 13.1%               | 14.4%                     | 0.0%                |
| Newcastle upon Tyne    | 1,447      | 10.9%               | 67.2%                 | 0.0%                | 21.5%                     | 0.0%                |
| Liverpool              | 1,871      | 10.5%               | 70.3%                 | 16.3%               | 2.5%                      | 0.0%                |
| Birmingham             | 6,715      | 7.4%                | 70.1%                 | 19.9%               | 1.8%                      | 0.0%                |
| Leeds                  | 6,079      | 7.1%                | 78.4%                 | 11.6%               | 2.6%                      | 0.0%                |
| Bristol, City of       | 2,649      | 6.6%                | 47.4%                 | 13.6%               | 31.3%                     | 0.0%                |
| Westminster            | 2,786      | 5.1%                | 76.0%                 | 12.3%               | 6.3%                      | 0.0%                |
| Sheffield              | 2,857      | 5.0%                | 78.8%                 | 12.7%               | 3.0%                      | 0.0%                |

### 5. How quickly burglaries are closed with "no suspect identified"

Each burglary's crime ID in the police.uk street files was joined to the monthly outcome files, where the month is the month the outcome was recorded. Shares are of all burglaries recorded in the month. Months after about March 2026 have not had time to mature.

| Scope                                          | Month recorded | Burglaries | No-suspect outcome in the same month | Within one month | Within three months | Ever (to Aug 2026) | Charge event ever |
|------------------------------------------------|----------------|------------|--------------------------------------|------------------|---------------------|--------------------|-------------------|
| all forces in archive (excl. GMP, BTP partial) | 2023-09        | 20,341     | 33.8%                                | 57.6%            | 68.7%               | 72.5%              | 7.6%              |

## 6. After a charge: burglary in a dwelling (including aggravated), magistrates' and Crown courts, England and Wales

Ministry of Justice outcomes by offence, principal-office basis. Calendar years 2010 to 2016 are on the older processing method and are not strictly comparable with the years ending March 2017 onwards. Average custodial sentence length covers determinate immediate custody only.

| Year | Proceeded against | Convicted | Sentenced | Immediate custody | Custody rate | Average custodial sentence (months) | Suspended sentence | Community sentence |
|------|-------------------|-----------|-----------|-------------------|--------------|-------------------------------------|--------------------|--------------------|
| 2010 | 19,622            | 14,277    | 14,153    | 7,574             | 53.5%        | 22.6                                | 1,584              | 4,473              |
| 2011 | 19,538            | 14,544    | 14,440    | 8,314             | 57.6%        | 23.0                                | 1,569              | 4,181              |

| Year                   | Proceeded against | Convicted | Sentenced | Immediate custody | Custody rate | Average custodial sentence (months) | Suspended sentence | Community sentence |

## 7. Method

Home Office figures use the "outcomes for offences recorded in the period" basis, the bulletin's headline basis; outcome groups are charged or summonsed (outcome 1), out-of-court (2, 3, 6, 7, 8), evidential difficulties with a suspect identified (15, 16), no suspect and victim does not support (14), investigation complete with no suspect identified (18), not yet assigned, and other. The force league table ranks the 43 territorial forces by outcome 1 as a share of residential burglaries recorded in 2025/26. London figures use every police.uk burglary recorded by the Metropolitan and City of London forces, mapped from its 2021 lower-layer super output area to the 2024 local authority; 2.7% of rows across all forces, mostly with no location, could not be mapped and are excluded from borough rows but kept in force totals. The April 2025 to March 2026 window is the most recent twelve months in which every month was at least six months old at the August 2026 release. Court figures count defendants whose principal offence was burglary in a dwelling or aggravated burglary.
